

Subject Index to Volume 1

A

Adenocarcinoma cell line, pulmonary, glucocorticoid regulation of surfactant protein synthesis, L385
Adenosine monophosphate, cyclic accumulation, endothelium, L259 calcium release and, airway epithelium, L116 lung transport and, L86
Adenosine triphosphatase, proton-translocating, alveolar epithelial cells, L438
Adenosine triphosphate, lung surfactant, alveolar phospholipid uptake and, L248
 β -Adrenergic agonist, secretion, intracellular pH regulation of, lung, L354
Airway antigen challenge of, local mediator release, L366 diseases, peptide role in, L144 epithelium release of intracellular calcium, L116 sodium-chloride cotransport, β -adrenergic regulation of, L125 function, tryptase and chymase roles in, L39 IP₃ formation, phorbol ester inhibition of, L209
Alkalosis, respiratory, intracellular pH regulation of, lung, L354
Allergy, antigen challenge, bronchial segment, L366
Alveolar cells, type II, fibroblast-pneumocyte factor, L174
Alveolitis, experimental, pulmonary edema and, hyaluronan accumulation in lung, L379
Amiloride, sodium ion conductance inhibitable by, respiratory epithelium in oocytes, L284
Amino acids precursor, regulation, L163 transport, erythrocytes and, L272 uptake, endothelial cell, diethyl maleate and hyperoxia effects, L265
Aminopeptidase P, pulmonary vascular surface, L53
Angiotensin-converting enzyme protein kinase C, 5-HT uptake and, endothelial cells, L253 pulmonary vascular surface, L53
Angiotensin I, pulmonary vascular surface, L53
Antigen challenge, allergy and, bronchial segment, L366 very late activation, extracellular matrix components, L331
Antioxidant enzymes activation of phospholipase A₂, pulmonary endothelium, L430 development, lung, thyroid inhibition of, fetus, L94 hydrogen peroxide tolerance, rest period induction of, L226
 α_1 -Antitrypsin gene, emphysema and, L147 Apoprotein, pulmonary surfactant, L13 Arachidonic acid, oxidant-mediated activation, pulmonary endothelium, L430 ATP: see Adenosine triphosphate ATPase: see Adenosine triphosphatase

B

2',7'-Bis(carboxyethyl)-5,6-carboxyfluorescein, active hydrogen secretion, alveolar epithelial cells, L438 Bleomycin, lung injury, experimental alveolitis, L379
Bradykinin calcium release and, airway epithelium, L116 pulmonary vascular surface, L53 release, tracheal epithelia, L361
Bronchi antigen challenge of, local mediator release, L366 histamine release, cellular influx and, L277
Bronchiolar epithelium, development of, brief perinatal hypoxia effects, L80 Bronchoalveolar lavage, hyaluronan accumulation, pulmonary edema, alveolitis, L379
Bronchoconstriction, cellular influx, histamine release and, L277 t-Butylhydroperoxide, sublethal injury, inhibition of signal transduction and, type II pneumocytes, L217

C

Cachectin, lung injury induced by, platelet activating factor and, L232 Calcium β -adrenergic regulation, airway epithelium, L125 intracellular, release by two second messengers, airway epithelium, L116 cAMP: see Adenosine monophosphate, cyclic Catalase, thyroid hormone inhibition, lung, fetus, L94 Chemiluminescence, oxygen tolerance, neonate, L411 Chemotaxis activity for monocytes, bronchial epithelial cells, L130 lung, bronchial epithelial cells, L71 lymphocytes, bronchial epithelial cells, L109 Chloramine, production, neutrophils, TNF priming for, L338 Chloride, secretion, tracheal epithelia, L361 Choline-phosphate cytidylyltransferase, biosynthesis, developing lung, fetal, L195 Chymase, mast cell, airway function and, L39 Clara cells, perinatal hypoxia effects on development, L80 Cloning, gene, cystic fibrosis gene, L47 Collagen-like sequence, surfactant protein SP-A, lung, L421 Corticosteroids, alveolar dimension and number, L240 Cyclooxygenase, release, tracheal epithelia, L361 Cystic fibrosis, gene, search for, L47 Cytodifferentiation, lung development, L311

D

Deoxyribonucleic acid, diagnosis, search for cystic fibrosis gene, L47 Development: see also Growth lung fatty acid biosynthesis, fetus, L195 immunotargeting, L311 regulation of dimension and number, alveoli, L240 Dexamethasone alveolar dimension and number, L240 stimulation of surfactant protein A synthesis, postnatal, L137 Diethyl maleate glutathione response to, erythrocytes and, L272 oxygen and glutathione, endothelial cells, L265 Dipalmitoyl phosphatidylcholine, lung surfactant, historical perspectives, L1

E

Edema pulmonary cAMP and sodium transport, L86 lung accumulation of hyaluronan and, L379 vascular endothelial, TNF and interleukin 1 α , L399 Eicosanoids, tumor necrosis factor-induced lung injury and, L232 Emphysema, α_1 -antitrypsin gene and, L147 Endoplasmic reticulum, rough, perinatal hypoxia effects on development, L80 Endothelial cells glutathione and precursor amino acid uptake, diethyl maleate and hyperoxia effects, L265 histamine and inositol phosphate accumulation, L259 5-HT uptake by, translocation of protein kinase C and, L253 pulmonary, platelet-derived growth factor production, endotoxin effects, L65 Endotoxin platelet-derived growth factor production and, pulmonary endothelial cells, L65 superoxide dismutase mRNA and, lung, L61 vascular endothelial permeability, L399 Eosinophil, influx, histamine release and, bronchi, L277 Epithelial cells alveolar hydrogen secretion by, L438 type II, processing of pulmonary surfactant protein B in, L100 alveolar type II, polypeptide growth factors and, L23 bronchial chemoattractant activity for monocytes, L130 chemotactic activity release for lymphocytes, L109 chemotaxis, lung fibroblasts and, L71 Erythrocytes, glutathione response and, diethyl maleate or hyperoxia, L272 Extracellular matrix, components, receptors for, L331

SUBJECT INDEX TO VOLUME 1

F

Fatty acids, biosynthesis, developing lung, fetal, L195

Fetus

antioxidant enzyme development, lung, thyroid inhibition of, L94
fatty acid biosynthesis, developing lung, L195
lung, substrate utilization, L318

Fibroblasts

chemotaxis, bronchial epithelial cells, L71
fibroblast-pneumocyte factor, L174
proliferation, polypeptide growth factors and, L23
Fibronectin, chemotaxis, bronchial epithelial cells, L71
Furosemide, sodium-chloride cotransport and, airway epithelium, L125

G**Gas**

exchange
alveolar dimension and number, L240
development of lung alveoli and, L221
Gene expression, activity-dependent, L289
Genes, cystic fibrosis, L47
Glucocorticoids
biosynthesis, developing lung, fetal, L195
surfactant protein synthesis and, pulmonary adenocarcinoma cell line, L385
synthesis of surfactant protein A, postnatal, L137

Glutathione

cellular, regulation, L163
protection from hyperbaric oxygen, selenium effects, L393
response to diethyl maleate or hyperoxia, erythrocytes and, L272
thyroid hormone inhibition, lung, fetus, L94

TNF-induced lung injury and, L232
uptake, endothelial cell, diethyl maleate and hyperoxia effects, L265

Glutathione peroxidase, hyperoxide tolerance, rest period induction of, L226**Glycoconjugate, secretion, platelet-activating factor effects, tracheal submucosal gland, L373****Glycoprotein, pulmonary surfactant, L13****G protein**
accumulation, endothelium, L259
chemical synaptic transmission, L289**Growth: see also Development**
compensatory, lung, physical forces and, L179**H****Histamine**

accumulation, endothelium, L259
antigen challenge of, local mediator release, L366
IP₃ formation induced by, phorbol ester inhibition of, airway smooth muscle, L209

release, cellular influx and, bronchi, L277

Hormonal regulation, dimension and number, alveoli, L240**5-HT: see 5-Hydroxytryptamine; Serotonin**

Hyaluronan, lung accumulation of, pulmonary edema and, L379

Hydrogen, secretion, alveolar epithelial cells, L438

Hydroperoxide, lipid, pulmonary endothelium, L430

5-Hydroxytryptamine: *see also* Serotonin uptake, translocation of protein kinase C and, endothelial cells, L253

Hyperoxia

diethyl maleate and glutathione, endothelial cells, L265
glutathione response to, erythrocytes and, L272

hyperbaric, glutathione protection from, selenium effects, L393

oxygen tolerance, neonate, L411
tolerance, rest period induction of, L226

Hypocholesterol acid, production, neutrophils, TNF priming for, L338

Hypoxia

perinatal, development of bronchiolar epithelium and, L80
postnatal development and, lung alveoli, L221

I**Immunotargeting, lung development, L311**

Inositol 1,4,5-trisphosphate, histamine-induced formation, phorbol ester inhibition of, airway smooth muscle, L209

Inositol phosphate
accumulation, endothelium, L259
calcium release and, airway epithelium, L116

Interleukin, lung cell proliferation and, L23

Interleukin 1 α , TNF and, vascular endothelial permeability, L399

IP₃: *see* Inositol 1,4,5-trisphosphate

L

Laminin, extracellular matrix components, L331

Lectins, calcium-dependent, lung, L421

Lipopopolysaccharide
endotoxin effects
lung, L61

pulmonary endothelial cells, L65

Lipoprotein, pulmonary surfactant, L13

Lung
adenocarcinoma cell line, glucocorticoid regulation of surfactant protein synthesis, L385

alveolar phospholipid uptake, secretagogues for surfactant and, L248
alveoli

dimension and number, L240
postnatal development, short-term perinatal oxygen effects, L221

chemotaxis, bronchial epithelial cells, L71

compensatory growth, physical forces and, L179

development
dexamehtasone effects, postnatal, L137

fatty acid biosynthesis, fetus, L195

immunotargeting, L311

endothelium, phospholipase A₂ activation in, L430

epithelium, spermidine uptake, L346

hyaluronan accumulation, pulmonary edema and, L379

immunity, chemoattraction on monocytes, L130

injury

polypeptide growth factors and, L23

tumor necrosis factor-induced, platelet-activating factor and, L232

lymph: *see* Lymph

perinatal, substrate utilization, L318

phospholipid transfer proteins, L190

sodium transport, cAMP and, L86

superoxide dismutase mRNA, endotoxin effects, L61

surfactant

apoproteins, review, L13

historical perspectives, L1

hydrophobic, processing in type II cells, L100

regulation by intracellular pH, L354

surfactant protein SP-A, studies of structure, L421

vascular surface, peptidase enzymes of, L53

Lung cells, proliferation, regulation by polypeptide growth factors, L23

Lymph, lung, capillary injury-related protease, L202

Lymphocytes, chemotactic activity release for, bronchial epithelial cells, L109

Lymphoid tissue, bronchial-associated, chemotactic activity for lymphocytes, L109

M**Macrophages**

alveolar

chemoattractant activity, monocytes, L130

polypeptide growth factors and, L23

influx, histamine release and, bronchi, L277

Mast cells, tryptase and chymase, airway function and, L39

Mesenchymal cells, bronchial, chemotaxis, lung fibroblasts and, L71

Mesenchymal-epithelial interactions, fibroblast-pneumocyte factor, L174

Methimazole, thyroid hormone inhibition, lung, fetus, L94

Mitochondria, bronchiolar epithelium, perinatal hypoxia effects on development, L80

Molecular genetics, cystic fibrosis gene, L47

Monocytes, chemoattractant activity for, bronchial epithelial cells, L130

Muscle, smooth, airway, IP₃ formation, phorbol ester inhibition of, L209

Myeloperoxidase, production, neutrophils, TNF priming for, L338

N**Neonate**

lung, substrate utilization, L318

oxygen tolerance, L411

short-term oxygen effects, postnatal development of lung alveoli, L221

Neuropeptides, activity, mast cells, airway function and, L39

Neurotransmitters, chemical synaptic transmission, cellular and molecular mechanisms, L289

Neutrophils, TNF priming of, hypochlorous acid production, L338

SUBJECT INDEX TO VOLUME 1

O

Oocytes, respiratory epithelium, amiloride-inhibitable sodium ion conductance from mRNA, L284

Oxidant injury

 cellular glutathione, L163
 sublethal, signal transduction and, type II pneumocytes, L217

Oxygen

 diethyl maleate and, glutathione response to, erythrocytes and, L272
 endotoxin effects, lung, L61
 exposure, high, tolerance to, L226
 hyperbaric, glutathione protection from, selenium effects, L393
 short-term perinatal, postnatal development of lung alveoli and, L221
 tolerance, neonates, L411
 toxicity, protection from, rest period and, L226

P

Paraquat, spermidine uptake, type II pneumocytes, L346

Peptidase enzymes, pulmonary vascular surface, L53

Peptides

 chemical synaptic transmission, cellular and molecular mechanisms, L289
 epithelium and inflammatory, role in airway diseases, L144

Permeability, vascular endothelial, TNF and interleukin 1 α effects on, L399

Peroxidase, thyroid hormone inhibition, lung, fetus, L94

pH

 intracellular
 alveolar epithelial cells, L438
 regulation of lung surfactant secretion, L354

Phorbol esters

 inhibition, histamine-induced IP₃ formation, airway smooth muscle, L209
 lung surfactant, alveolar phospholipid uptake and, L248
 serotonin uptake and, endothelial cells, L253

Phosphatidylcholine

 lung, L190
 metabolism, secretagogues for lung surfactant and, L248
 secretion, intracellular pH regulation of, lung, L354

Phosphatidylinositol, lung, L190

Phosphodiesterase inhibitor, sodium transport and, lung, L86

Phospholipase A₂, oxidant-mediated activation, pulmonary endothelium, L430

Phospholipase C, phorbol ester effects, airway smooth muscle, L209

Phospholipids

 alveolar, uptake, secretagogues for surfactant and, L248
 lung development, immunotargeting, L311

Phosphoproteins, chemical synaptic transmission, cellular and molecular mechanisms, L289

Platelet-activating factor

 cyclooxygenase product release and, tracheal epithelia, L361
 glycoconjugate secretion and, tracheal submucosal gland, L373
 tumor necrosis factor-induced lung injury and, L232

Platelet-derived growth factor
 lung cell proliferation and, L23
 production, endotoxin effects, pulmonary endothelial cells, L65

Pneumocytes

fibroblast-pneumocyte factor, L174
 growth and differentiation, physical forces and, L179

type II
 spermidine uptake, L346
 sublethal oxidant injury inhibition of signal transduction, L217

Pneumonectomy, compensatory growth and, lung, L179

Polyamines, uptake, type II pneumocytes, L346

Polypeptide growth factor, regulation, lung cell proliferation, L23

Prazosin, sodium-chloride cotransport and, airway epithelium, L125

Propylthiouracil, thyroid hormone inhibition, lung, fetus, L94

Prostaglandin D₂, antigen challenge of, local mediator release, L366

Prostaglandins, release, tracheal epithelia, L361

Protease, capillary injury-related, lung lymph, L202

Protease-antiprotease balance, emphysema and, L147

Protein
 phospholipid transfer, lung, L190
 surfactant-associated, processing in type II cells, L100

synthesis, endotoxin effects, lung, L61
α₁-Proteinase inhibitor, emphysema and, L147

Protein kinase C

 IP₃ formation and, airway smooth muscle, L209
 translocation of, 5-HT uptake and, endothelial cells, L253

Proteoglycans, extracellular matrix components, L331

Pulmonary edema: *see* Edema, Putrescine spermidine uptake, type II pneumocytes, L346

R

Receptors

 adrenergic, regulation of sodium-chloride cotransport, airway, L125
 β-adrenergic, release of calcium, airway epithelium, L116

 extracellular matrix components, L331

Red blood cells: *see* Erythrocytes,

 Respiratory distress syndrome

adult

 lung surfactant, L1
 TNF and interleukin 1 α effects, L399
 capillary injury-related protease, lung lymph, L202

S

Secretagogues, lung surfactant, alveolar phospholipid uptake and, L248

Selenium, deficiency, glutathione protection from hyperbaric oxygen, L393

Sepsis, platelet-derived growth factor production and, pulmonary endothelial cells, L65

Serotonin: *see also* 5-Hydroxytryptamine uptake, translocation of protein kinase C and, endothelial cells, L253

Serpin, emphysema and, L147

Shock, endotoxic, vascular endothelial permeability, L399

Signal transduction, type II pneumocytes, sublethal oxidant injury inhibition of, L217

Sodium, transport, regulation by cAMP, L86

Sodium-chloride cotransport, β-adrenergic regulation of, airway epithelium, L125

Sodium ions, amiloride-inhibitable conductance from mRNA, respiratory epithelium in oocytes, L284

Spermidine, uptake, type II pneumocytes, L346

Stress, mechanical, lung cell growth and differentiation with, L179

Substrates, utilization, perinatal lung, L318

Superoxide dismutase
 endotoxin effects, lung, L61
 hydroperoxide tolerance, rest period induction of, L226

subcellular generation, neonate, L411
 thyroid hormone inhibition, lung, fetus, L94

Surfactants

 apoproteins, review, L1
 biosynthesis, fetal lung, L195
 fibroblast-pneumocyte factor, L174

historical perspective, L1
 hydrophobic, processing in type II cells, L100

lung cell proliferation and growth factors, L23

phospholipid transfer proteins and, L190

protein A, simulation of synthesis, dexamethasone and, L137

protein SP-A, lung, L421

protein synthesis

 glucocorticoid regulation of, pulmonary adenocarcinoma cell line, L385
 secretagogues for, alveolar phospholipid uptake and, L248

uptake, intracellular pH regulation of, lung, L354

Synaptic transmission, chemical, cellular and molecular mechanisms of, L289

T

Terbutaline, lung surfactant, alveolar phospholipid uptake and, L248

Thyroid hormone, inhibition, antioxidant enzyme development and, lung, fetus, L94

TNF: *see* Tumor necrosis factor

Tracheal epithelia, cyclooxygenase product release from, L361

Tracheal submucosal gland, glycoconjugate secretion, platelet-activating factor effects, L373

Tryptase, mast cell, airway function and, L39

Tumor necrosis factor

 interleukin 1 α and, vascular endothelial permeability, L399

lung cell proliferation and, L23

lung injury induced by, platelet-activating factor and, L232

priming of neutrophils, hypochlorous acid production, L338

V

Volume, density, alveolar dimension and number, L240

Z

Zymosan, production, neutrophils, TNF priming for, L338
